

#### Trade Away Disclosure for Period of January 1, 2021 – March 31, 2021

The information in this document is supplemental to the material provided in the advisory program disclosure brochures for *Benjamin F. Edwards & Co* and *Benjamin F. Edwards Wealth Management* (collectively "BFE"), which are <u>available on our website</u>. This information is intended for clients who participate, or are considering participating, in BFE's advisory programs which involve the use of third-party asset managers (Managers). It is intended to provide a general idea of the frequency, if any, of "step out" trades performed by the Managers BFE sponsors, as well as a summary of costs associated with the step out trades.

Step out trading occurs when Managers execute trades away from BFE's primary custodians and/or clearing firms. Managers may choose to do this for a variety of reasons including to fulfil their obligation to seek the best execution for their clients' orders, or to access better liquidity. This document is designed to provide insight into each Manager's practices so that clients may make informed decisions as to whether to participate in the managed programs Benjamin F. Edwards sponsors.

All of the data provided herein was supplied directly by the respective Manager. The level of detail provided by Managers varies and BFE has not independently verified this information. BFE makes regular inquiries with the Managers it sponsors and will update this information from time to time. If a Manager does not respond to BFE's inquiries, that Manager's information will not be included in this document.

For more information, please see our advisory program disclosure brochures or contact your Benjamin F. Edwards financial advisor.
